

YUTRO.com

[Video klip sa sajma iSEC 2013 \(klik vodi na Youtube\)](#)

Kompanija YUTRO.com postoji samostalno na srpskoj ICT sceni već šest godina. U IT industriji smo poznati kao sistem integratori i prvi Managed Service Provideri. Pioniri smo cloud computinga, kako u Srbiji tako i u regionu. Korišćenjem Microsoft HyperV i Citrix tehnologija uspjeli smo poslednjih godina da odgovorimo na najkopleksnije zahteve kada je u pitanju serverska i desktop virtualizacija.

Od osnivanja pa do danas, vrlo važan deo fokusa našeg poslovanja je bezbednost. Razvijajući neke od najvećih informacionih sistema, i radeći za najzahtevnije klijente u Srbiji, imali smo priliku da se specijalizujemo za bezbednosni aspekt informacionih sistema, od projektovanja do redovnog održavanja. O iskustvu i uspešnosti, umesto nas govore naše reference: JugoImport SDPR, Gazprom Neft, Family Sport, Kolubara-Metal, SO Topola kao i mnogi drugi.

Postavši jedini F3 partner u regionu renomirane američke kompanije McAfee koja proizvodi antivirus sisteme koje koriste najveće svetske vlade, bezbedonosne, vojne i policijske ustanove širom sveta prvi na našem tržištu prezentujemo koncept „cloud security“.

Kompanija YUTRO.com je članica Udruženja e-Razvoj, od osnivanja.

Shvativši važnost sajma iSEC, kao centralnog događaja u Srbiji koji se bavi svim aspektima bezbednosti u poslovanju, kompanija YUTRO.com će i ove godine nastupiti prezentujući novitete iz oblasti zaštita e-mail komunikacije kao i arhiviranja iste, kompanije McAfee. Posetioci će imati prilike da vide i novu verziju našeg cloud monitoring servisa „Enthusio“, koji služi za nadzor svih komponenata ICT sistema koji imaju IP adresu. Takođe ćemo prezentovati i novu generaciju security USB diskova sa enkripcijom, renomiranog svetskog proizvođača Kingston.

U toku sajma ćemo održati i prezentaciju „Bezbednost podataka u oblaku – CLOUD SECURITY“ i učestovati na okruglom stolu „Da li je moguća integracija = monitoring objekata + monitoring IP sistema“.

YUTRO.com company has existed independently at the Serbian ICT scene for six years. We are famous in the IT industry as system integrators and the first Managed Service Providers. We are the pioneer of Cloud Computing, both in Serbia and the region. Using Microsoft Hyper V and Citrix Technologies, we managed in the last few years to meet the most complex requirements as regarding the server and desktop virtualization.

Since our founding, a very important section of our business focus is security. Developing some of the largest information systems and operating for the most demanding clients in Serbia, we had the opportunity to specialize for the information system security aspect, from design to regular maintenance. Our references speak instead of us about our experience and success: Yugoimport SDPR, Gazprom Neft, Family Sport, Kolubara-Metal, Municipality of Topola and many others.

Having become the only F3 partner in the region of the renowned US McAfee company, manufacturing antivirus

systems used by the largest worldwide Governments, security, military and police authorities all over the world, we are the first in Serbian market to present the Cloud Security concept.

YUTRO.com company is a member of e-development Association since its founding.

Having realized the importance of iSEC fair as the central event in Serbia dealing with all aspects of business security, YUTRO.com company will participate also this year presenting the innovations within the e-mail communication protection, as well as its archive saving, by McAfee company. The visitors will be able to see also the new version of our Cloud Monitoring Service Enthusio, used for monitoring of all components of ICT system having the IP address. We shall also present the new generation of security USB disks with encryption of the renowned worldwide manufacturer Kingston.

During the event, we shall also have a presentation Data Cloud Security – CLOUD SECURITY and participate in the Round Table Conference "Is it possible: Integration = Facility Monitoring + IP System Monitoring"
